Chris,

Good to see you yesterday. You and Karen are correct, I was remembering incorrectly which facility it was. The table she sent out shows a test of the dust collector at RI Recycled Metals on Allens Ave. We are interested in learning more about how they will be testing the equipment, including how they capture & vent the emissions that go to the control devices. If/when the test is scheduled, would you let us know so that we can set up a conference call?

Thanks.

Steve

Steve,

Regarding our conversation yesterday, I spoke with Karen Peltier of OAR regarding emissions testing at the SMM facility on Allens Avenue in Providence. She stated that she has no knowledge of any upcoming tests (or why they would test). She does have RI Recycled Metals (also on Allens Avenue) on a testing list, but no upcoming tests are planned.

Chris

Christopher John,
